

On the Agenda: June 24 City Council Meeting

The next meeting of the Newport Beach City Council will be on Tuesday, June 24 at 4 p.m. The full agenda is available [here](#).

Agenda items include:

- A study session item on preparing for the implementation of advanced air mobility. Staff and a City consultant will discuss the rapidly developing transportation system known as Advanced Air Mobility (AAM). AAM includes new types of aircraft and emerging technologies that have the potential to provide additional regional and local mobility options for passengers, air cargo and emergency services. The discussion will include potential steps the City could take to prepare in advance of the local implementation of AAM.
- Drinking water quality report on public health goals. The California Health and Safety Code requires all water agencies to prepare a report every three years if any water quality samples collected between 2022 and 2024 exceed a public health goal or maximum contaminant level goal. These goals are separate from enforceable standards. The City's water system meets all state and federal drinking water standards and complies with all maximum contaminant levels.
- A resolution to collect certain sewer and recycling fees through the property tax roll. The resolution would allow the City to collect sewer and/or recycling fees from about 5,600 customers who do not currently receive a water bill from the City. The California Health and Safety code allows local agencies to collect sewer and recycling fees through the property tax roll. Enrolling these charges on the property tax roll is a common practice, particularly in instances where a customer is not receiving water service from the billing agency.
- Appointments to scheduled and unscheduled board and commission vacancies. The Council will consider approving nominees to the Board of Library Trustees, Building and Fire Board of Appeals, City Arts Commission, Civil Service Board, Harbor Commission, Parks, Beaches & Recreation Commission, and Planning Commission.
