I am writing in support of Resolution No 2021-59 awarding the contract for the installation of underground substructures as part of the West Balboa Island Underground Assessment District AD-113.

With this award, after more than four years of effort, we will finally see backhoes digging dirt.

Although the cost of this project is basically funded by the property owners, we recognize that in order to get this far along, it has taken the commitment of significant City Staff resources. Without the continued support of the City Council and the Public Works Department, we would never have been able to reach this major milestone.

When completed this project will clearly be of benefit to the West Balboa Island property owners, but we feel it will also be of benefit to the City as a whole by cleaning up a portion of the City's network of unsightly overhead utility lines.

We sincerely appreciate and thank you for your ongoing commitment in support of not only our project, but your support of the various other Underground Assessment District projects throughout the City
